Do you have any suggestions to have made it better?

Speech only/teleconf option? download presentations in advance in case picture bad? Don't point to people in audience to introduce them - we can't see them if we are not in the room.

Sound was dreadful, camera was fixed so could not see video or presentations. Speakers should have talked into the microphones, live stream cut out frequently and then totally after 32 minutes. Very disappointing as we didn't get to see/hear let alone join in with the discussions after the refreshment break (unless it comes back online)

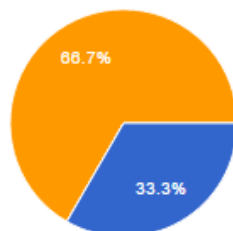

Test the quality of any presentation/video before the day

Please provide any additional comments for future improvements.

Find a better way of broadcasting it. I had to give up. Disappointing as I've never tried an online conference before
